Virginia State Corporation Commission
Richmond, Virginia

Gentlemen:

Recently we received the final report of the National Capital Planning Commission approving our proposal to locate the new Central Intelligence Agency headquarters building on a portion of the Bureau of Public Roads property at Langley, Virginia. With the receipt of this report, we have decided to proceed with our plans for the development of that site.

While we have not yet established a firm planning and construction schedule, we are hopeful that the actual building construction may begin early in 1957. It will be necessary, of course, to plan for the availability of transit service between the site and various parts of the metropolitan area of the District of Columbia, including the contiguous cities and counties in Virginia and Maryland. We are quite anxious to begin planning for this service at the earliest practicable time in order that transit companies enfranchised to operate in that area can schedule their planning accordingly.

I should like to request that you designate a member or representative of your Commission with whom our Building Planning Officer might consult within the next few weeks to discuss this problem and the appropriate procedures for us to follow in developing plans for transit service.

Your cooperation and assistance in this matter are appreciated.

Sincerely,
